

19 DIE IN TWO EXPLOSIONS

GRAIN DEPARTMENT OF RAILROAD COMMISSION ESTABLISHED; OFFICES MOVED TO BISMARCK FROM FARGO

Consolidated Work of Grain Inspection, Accounting and Inspection of Weights and Measures

LUND APPOINTED HEAD

Former Auditor of Board of Administration Is Named by Commission.

A consolidation of the work of the grain inspection, elevator accounting and weights and measures departments will be effected by the state railroad commission under plans drawn by the commission for the resumption of the supervision and inspection of grain and elevators, which was terminated at the passage of the grain grading act, according to Chairman Milhollan.

The commission decided to establish what will be known as the grain department of the state railroad commission. Ole Lund, formerly employed as an auditor by the board of administration was chosen to head the new department. His duties, it was stated, will be to supervise the entire grain inspection and accounting work.

The grain inspection and weights and measures departments will be moved from Fargo to Bismarck as soon as possible. Chairman Milhollan said, Mr. Lund, successor of W. C. Palmer, of the state agricultural college, who was chief grain inspector under the grain grading act which was held unconstitutional by the supreme court of the United States. Since that decision Mr. Palmer has continued to head the department temporarily established by the railroad commission under a statute revived as a result of the decision nullifying the grain grading act, without pay. The elevator accounting department recently was moved to Bismarck. J. I. Brady will continue as head of this department, and an inspector of weights and measures will be appointed.

According to members of the railroad commission, a study of the administration of the grain grading act disclosed that there was much overlapping of work. An inspector of one department, it was said, would follow an inspector of another department into a town. It is planned to maintain a corps of inspectors who are familiar with elevator accounting methods so that they can both inspect grain and the accounts of elevators, it was said. All inspectors will be required to obtain federal licenses, it was said. The consolidation order may reduce the number of persons heretofore employed in this work.

Quarters for the department will be provided on the fourth floor of the Bank of North Dakota building.

SWIMMING POOL TO OPEN SOON

Probably About June 1, Mayor Says

The swimming pool will soon be open. Mayor Lenhart said today that it probably would be opened about June 1, dependent upon the weather.

Many inquiries have been made by the kiddies, and grownups, too, as to when they would again be able to splash in the pool. The city authorities believe that it has been too cool up until now.

There is about \$175 left over from last year's receipts at the pool to be used in starting it off this year. Rumors that only boys and girls would be admitted to the pool this year are stated to be incorrect. The pool will be run on the same general plan as last year.

COMPENSATION CLAIM ALLOWED BY BUREAU HERE

The Workmen's Compensation Bureau this morning allowed the claim of Anna M. Stenseth of Endrelin for compensation. Mrs. Stenseth's husband, who was employed by the Moore and Liberty Telephone Company at Endrelin, was instantly killed by electric shock while pulling a switch on a pole of the Midwest Power Company's. The Power Company carries a very high voltage and the alternating currents of the Power Company was causing a buzzing in the telephones of the Moore & Liberty line.

The injured employee left a wife twenty-eight years old and five children, the oldest one being about six years of age. Mrs. Stenseth will be given \$20.00 a week until the children become eighteen years of age; and then will receive \$10.50 until she dies or remarries. It is estimated that if the dependents live their life expected, the total awards made will amount to something over \$25,000.00.

Electricity for heating and cooking is making headway in Switzerland.

HER MURDERER IS LYNCHED

MRS. BILLY KITCHENS

By NEA Service

Davidboro, Ga., May 26.—Mrs. Billy Kitchens, bride of six weeks, and rural mail distributor, was shot to death by Charlie Atkins, 15-year-old negro, who wanted the machine the girl was driving.

Mrs. Kitchens was driving along a road through a swamp when Atkins sprang out and demanded she stop. The girl reached for a revolver as Atkins shot her in the face with a shotgun.

Atkins then dragged her body to a swamp, where it was found later, and drove the machine home.

A posse captured Atkins, flogged him, strung him up and then pumped his body full of lead.

INDICTED FOR KIDNAPING

Detective Who Figured in Stillman Case Accused

New York, May 26.—Edmund Leigh, private detective, who figured in the Stillman case, today was indicted for kidnaping on the charge by August Probst, butler, that an attempt had been made to railroad him out of the country because of a love affair with a Pittsburgh society girl.

Leigh testified recently that he and a lawyer representing James A. Stillman, New York banker, paid Fred Beauvais, Indiana co-resident in the divorce suit against Mrs. Anna U. Stillman \$15,000 for four love letters purporting to have been written by her to the guide.

PUBLIC HELP ASKED BY HAYS

Wants Cooperation in "Cleaning Up Movies"

Pittsburgh, Pa., May 26.—A plea for the public to stand behind and help the motion picture producers in their efforts to maintain a clean moral tone in film production was voiced here today by Will H. Hays, president of the Motion Picture Producers and Distributors of America before an audience at Carnegie Institute.

He declared he was convinced of the sincerity of the large producers and distributors of the organization and he pledged his hearers the best efforts of his association.

WORLD FLIGHT IS DELAYED

Paris, May 26 (By the A. P.)—Major W. T. Blake and his companions, today again postponed their departure from the flying field on the second leg of their attempted flight around the world. They hoped, however, to get away for Lyons this afternoon.

GIVE HARDING 22 HANDICAP

Washington, May 26.—Warren G. Harding took his old title, editor of the Marion Star today in order to tee off with three score Washington newspaper men in the first annual tournament of the Washington newspaper golf club. The president was given a handicap of 22 strokes for play in today's tournament.

YOUTH CONFESSES HE KIDNAPED GIRL AND KILLED HER BECAUSE SHE CRIED

Camden, N. J., May 26.—Authorities here today planned to question George Elmer Monroe, 19, who yesterday is alleged to have confessed that he kidnaped 7-year-old Ida Kramer from her home in Woodbury, March 25, and killed her that night when she began to cry while he was taking her to a deserted house.

The child's body was found nearly a month later in a creek.

Monroe said he had kidnaped the girl with the intention of holding her for ransom. He had been without work and thought the plan would

RAILROAD BODY IN PRELIMINARY UTILITY RULES

Decides Against Emergency Increases for Gas and Water Companies Here

TO PROBE FURTHER

Permanent Rates to be Fixed Following Full Investigation Of the Cases

The state railroad commission today announced decision in preliminary requests in two Bismarck utility cases—the Bismarck Gas company and the Bismarck Water Supply company.

In both cases the railroad commission announced denial of emergency rates asked, and decided that permanent rates would be fixed after investigation, the commission not making final decision at this time.

The Bismarck Gas company case came before the commission because of the automatic discontinuance of the 25 per cent surcharge on May 1. The petitioner suggested a new schedule of rates, representing a decrease from the rate charged before May 1 of about 15 per cent, according to the company statement. The railroad commission held that the rates which existed before the surcharge would continue until permanent rates are fixed after valuation. This represents a decrease of 25 per cent.

According to the commission order the net rates which existed with the 25 per cent surcharge were \$2.81 1-4 per thousand for the first 10,000 cubic feet or less, and decreasing; with greater consumption in varying amounts to a minimum rate of \$1.62 1-2 per thousand for all over 70,000 cubic feet.

The proposed rate of the Gas company, with the surcharge deducted, and the 20-cent discount also lopped off, was \$2.63 per thousand for the first 10,000 cubic feet and decreasing in varying amounts to a minimum of \$1.55 per thousand for over 70,000 cubic feet.

The rate fixed by the commission temporarily is \$2.25 per thousand for the first 10,000 cubic feet and decreasing in varying amounts to a minimum of \$1.30 per thousand for 70,000 cubic feet or over.

The Gas company held the rate it proposed was necessary to prevent confiscation of its property, and cited the increased cost of coal because of the coal strike as one important factor.

The commission's order enclosed, "Giving full consideration to all the evidence of record in this proceeding the commission is of the opinion and finds that the temporary rates applied for are not necessary for relief from confiscation and that the rates established by this commission's order number 54 in docket 1501 should be continued in force as temporary rates pending valuation and further investigation as provided by law.

The commission also took notice of the complaint of E. G. Patterson as to quality of gas, its order stated, and said the company should within 60 days comply with the commission's order to provide a calorimeter and to test its product periodically.

The Bismarck Water Supply order was brief, the commission not going into the matter at length in considering the emergency matter. It stated that there was a difference of \$250,000 in the valuation claims by the city and the company, that the operating statements presented by both sides are at variance and that it would not make an emergency rate until further investigation. It stated that its engineering department must make an appraisal of the property.

The commission order said that if the water company statement were correct an increase would be justified. Briefs have not yet been submitted by the parties.

28 DEATHS IN BELFAST RIOTS

Belfast, May 26 (By the A. P.)—Since Saturday last 28 deaths from violence have occurred in Belfast, including six last evening and today. In East Belfast trenches were dug in several streets, the inhabitants fearing an attack.

VICTOR BERGER IS CANDIDATE

Milwaukee, Wis., May 26.—Victor Berger, twice refused a seat in the House of Representatives because he was convicted of violating the wartime espionage act, will be the socialist candidate for Congress in the Fifth Wisconsin district following a referendum by the Socialists to select a candidate.

TWO-YEAR-OLD BABY CRUSHED TO DEATH UNDER HEAVY ROLLER ON FARM NEAR HERE

When a boy driving a heavy, wooden roller on the farm of Joseph Gabel, 7 1-2 miles northeast of Bismarck, started to turn around he did not notice that 2-year-old Ralph Gabel was in the path. The heavy roller passed over the baby's head, crushing it, and causing instantaneous death. The accident happened yesterday afternoon. The baby, one of nine children, was playing about the roller, which was driven by a

young brother. The roller is used to crush clods in a newly plowed field. The boy was turning the roller around, preparing to unhitch the horses.

When the baby was picked up after the roller had passed over its head it was dead. The body was brought to Webb's undertaking parlors in this city. Funeral services will be held tomorrow morning at 9 o'clock at the Catholic church here.

HE TELLS MEN JUST HOW THEY MAY LACK CLASS

Avalon, Santa Catalina Islands, Cal., May 26.—Every man who "lays claim to any class at all has his pet shade of face powder, his particular fragrance in toilet water, his favorite flavor in shaving soap and his distinctive preference in nail polish, F. M. Head, of Los Angeles, declared in an address before the 16th annual convention of the California Pharmaceutical Association.

"The up-to-date man seeks to make himself just as attractive to women as they are supposed to make themselves to men," said Mr. Head.

CONFERENCE IS HELD HERE ON THE CAMPAIGN

Candidates and Committee Members Decided to Open Anti-League Fight June 5

Politics was buzzing around hotel lobbies here today, following a meeting of Governor Nestos and other candidates for state offices endorsed at Jamestown and Burleigh Spaulding and Theodore Nelson, of Fargo. The only announcement made from the meeting, held yesterday afternoon, was that plans for the primary campaign were discussed in a general way and that it was decided Governor Nestos would deliver the key-note address on June 5 at some place in the southeastern part of the state not yet selected.

R. J. Hughes, of Fargo, campaign manager for Senator McCumber, visited the city today, conferring with various McCumber workers and others. Headquarters for Mr. McCumber were opened at Mandan yesterday.

Petitions have been circulated but not yet filed placing William Lemke in the race for Justice of the Supreme Court. It was said by those circulating them that Mr. Lemke does not know of the action.

Gaius S. Woodledge, Minot lawyer, has filed petitions to place him on the ballot for the supreme court nomination. Candidates filed or who have announced their intention of filing include Attorney-General Sveinbjorn Johnson, W. H. Stutsman, Judge W. L. Nuessle, Judge A. G. Burr, Judge A. C. Cole, Judge M. J. Englert, Geo. E. Wallace, Judge Luther E. Bridges, Judge J. E. Robinson, N. J. Bohne. Six will be nominated in the primary and three selected in November.

TOOTH BRUSH DRILLS POPULAR

Practically Every Child in City Schools Now Has Tooth Brush

Every child in the Bismarck schools will have a tooth brush before the school year is ended, it was said today by Miss Esther H. Teichman, school nurse. The school board purchased 1,000 brushes, for distribution sometime ago, and the pupils are using them regularly.

The slogan adopted is: "Every child shall own a tooth brush and use it at least twice a day."

The tooth brushes were sold the children at 15 cents each. When the distribution was being made a teacher in one room asked all who had tooth brushes to hold up their hands. One youngster waived his hand vigorously. "I've got one," he said, "but I don't use it, 'cause it's new."

The tooth brush drill is much enjoyed by the children, according to Miss Teichman. Every room in the grade schools has had these drills. In connection with the drills a health talk is given by the school nurse. The important points, such as the kind to be used, the care of it, the reason for brushing and the manner of brushing, are carefully gone over by the nurse. She emphasizes that only three things should be put in the mouth—food, drink and tooth brushes.

GUEST IN HOME IS MURDERED

Des Moines, Ia., May 26.—Cleo Pringle, 25, was shot and killed today at the home of Mrs. Lark Sloan, in Valley Junction, where he had been visiting Neal O'Connell, who had been a close friend of Pringle. O'Connell is being held in the county jail for investigation in connection with the murder.

According to Mrs. Sloan, O'Connell shot and killed Pringle following a quarrel.

CLOTURE FOR SENATE URGED AT CONFERENCE

Speed-up Methods Upon Tariff Bill Are Proposed By G. O. P. Conference

Washington, May 26.—Cloture as a means of cutting down debate on the tariff bill was proposed at a conference of Republican senators and was discussed later in the senate. Opposition to the suggestion developed on both sides of the chamber, Democrats giving formal warning that any effort by the majority to put over a "gag" rule would be resisted to the utmost.

The proposal will be discussed further at a second majority conference called for Saturday. As drafted, the rule would apply not alone to the pending tariff bill but to all revenue and appropriation measures. It would not apply to any other legislation and would leave senators free to discuss the soldiers' bonus, ship subsidy and any other subject of special or general legislation. A majority vote of the senate only would be necessary for adoption of the rule.

Disappointed With Progress Many of the leaders on the Republican side heretofore have opposed cloture and today a number of the majority senators expressed doubt as to the advisability of the cloture rule, believing that it would delay rather than expedite action on the tariff bill. (Advocates of the cloture rule contended, however, that time would be saved in the end and it was indicated that a determined effort would be made to have the conference approve the proposal.)

Senate discussion of the cloture brought varying estimates as to the time that it would take to pass the bill, Senator Kellogg and some others on the majority side estimating that at the present rate of progress it would be from one to two years.

CHAS. CRANE NOT CONDEMNED

At Least French Foreign Office Pleads Ignorance

Paris, May 26 (By the A. P.)—The French foreign office has no knowledge of the reported conviction of Charles R. Crane, former American ambassador to China by a French military court at Damascus on a charge of inciting a riot as reported in press dispatches it was stated today.

Troubles in Syria were provoked by "injurious talk" by Mr. Crane, foreign office officials said, but up to the present moment they had no information regarding any condemnation.

Mr. Crane himself said he was confident the report of his conviction was an error.

WANTS INQUIRY MADE.

Washington, May 26.—A resolution directing Secretary Hughes to make immediate inquiry of the French government as to the correctness of reports concerning imposition of a 20-year sentence upon Charles R. Crane by a French military court at Damascus was introduced today by Rep. Sab. bath, Democrat, Illinois.

GUEST IN HOME IS MURDERED

Des Moines, Ia., May 26.—Cleo Pringle, 25, was shot and killed today at the home of Mrs. Lark Sloan, in Valley Junction, where he had been visiting Neal O'Connell, who had been a close friend of Pringle. O'Connell is being held in the county jail for investigation in connection with the murder.

According to Mrs. Sloan, O'Connell shot and killed Pringle following a quarrel.

BLAIR-DOVER CASE REOPENED

Washington, May 26.—The Blair-Dover controversy in the treasury described yesterday as closed by Secretary Mellon was again laid before President Harding today with presentation of petitions signed by more than a dozen members of the Ohio delegation in congress asking the reinstatement of C. C. Childs, of Ohio, former supervisor of collectors of the internal revenue bureau.

11 MINERS IN ALABAMA ARE BLAST VICTIMS

Eight Die When Explosion Wrecks Big Pennsylvania Packing House

82 ESCAPE FROM MINE

All Saved But the 11 Men Who Were Killed According to Mine Bureau Reports

Birmingham, Ala., May 26.—Eleven miners were killed last night in an explosion in Ackmar No. 3 mine of the Alabama Fuel and Iron Company, St. Clair county, according to reports today at the Birmingham station of the Bureau of Mines. Five of the men were white, according to the reports.

Eighty-two men were working in the mine at the time of the explosion, but all except the 11 who were killed escaped. Ten of the bodies have been recovered. The explosion was attributed to mine gas.

EIGHT DIE IN EXPLOSION Emporium, Pa., May 26.—Eight men were killed and two seriously injured when three packing houses at the plant of the Pricella Powder company at Sinnamoning, 16 miles from here, blew up shortly after noon today.

CAUSE UNKNOWN Sinnamoning, Pa., May 26.—Eight men were instantly killed and three others slightly hurt in a series of explosions which today blew into pieces three loading houses and another building of the Grassell Chemical company plant here. The cause of the explosion will probably never be determined as all of the men in the building when the powder let go were killed.

COMMISSION TO FIX TARIFF IS URGED BY GARY

President of United States Steel Corporation Advocates Also Sales Tax

New York, May 26.—Elbert H. Gary, in his address as president of the American Iron and Steel Institute, in session here today advocated that congress take the tariff out of business; that it play no favorites in its tendency to regulate things; that it substitute a sales tax for the income tax and that it forget the soldier bonus until the nation is less severely burdened financially.

As for the business future of America Mr. Gary declared himself as "still an optimist."

The tariff question, he declared, should be delegated for investigation to a commission of "well-paid, high-minded, intelligent, competent and nonpartisan appointees authorized to ascertain and communicate facts and figures. Their reports should be frequent so that if deemed necessary a change in or amendment to the tariff laws could be made at any time Congress was in session."

THINK NEGRO WAS LYNCHED

Kirvin, Tex., May 26.—A negro sought by a Freestone county mob at the time four other negroes were lynched in this community early this month following the murder of a young white girl has been missing from his home near here since last Saturday night, it became known last night.

Kirvin residents are of the belief that "he has gone the way of the other four."

SAYS SENTIMENT IS STRONG FOR CIGARETTE LAW

Fargo, May 26.—There is strong sentiment in the state for the cigarette law but it isn't crystallized to produce enforcement, Mrs. Elizabeth Anderson, state president of the W. C. T. U., told a second-day session of the state enforcement league here today. "All law-breakers are cowards," she said, adding that "if they were warned the licensing law would be enforced 99 per cent would stop selling cigarettes."

Officers will be elected this afternoon.

MRS. CHAPLIN TO REMAIN IN U. S.

Washington, May 26.—Mrs. Hannah Chaplin, mother of Charles Chaplin, motion picture actor, may be allowed to remain in the United States temporarily as an alien seeking medical treatment for mental disorders, it was decided today.

PRESBYTERIAN BOARDS TO BE CONSOLIDATED

General Assembly of Church
Makes Radical Changes in
Its Organization

DEBATE OVER MOVIES

Des Moines, Ia., May 25.—(By the A. P.)—Next year's general assembly of the Presbyterian church in the U. S. A. will be held at Indianapolis it was decided by the commissioners here this morning.

Des Moines, Ia., May 25.—Thirteen boards and other agencies of the Presbyterian church in the United States were eliminated and replaced by four new boards when the one hundred thirty-fourth general assembly voted to adopt the principal enacting clauses of the Stone report on consolidation of church agencies. This consolidation, the most radical reorganization step in 134 years' history of the church, precipitated the most spirited debate seen on the floor of the current general assembly. Continuous applause during Dr. John Timothy Stone's reading of part 1 of the report, and several test votes on minor issues, indicated early in the afternoon that the 800 odd commissioners were overwhelmingly in favor of the consolidation.

Debate Waxed Hot
Minority leaders of standpoint tendencies strove persistently, however, to stem the tide and at least postpone final action on the report until the next session. So hot did the debate become at times that it assumed the complexion of a filibuster.

They thus managed to defer a vote until time for adjournment loomed up, when a motion for a thirty minute extension was passed. This afforded time for passage of the first three paragraphs of part 1 of the resolution, in accordance with the seriatim rule adopted earlier. These three paragraphs contain the heart of the consolidation action, eliminating the six old agencies and creating the four new boards.

Agencies Eliminated

The agencies eliminated by the assembly's action are:
Board of foreign missions.
Board of home missions.
Woman's board of foreign missions.
Woman's board of home missions.
Board of publication and Sabbath school work.

General board of education.
Board of ministerial relief and sustenance.
Board of the church erection fund.
Board of missions for freedmen.
Board of temperance and moral welfare.

Permanent committee on evangelism.

Permanent committee on men's work.

Permanent committee on Sabbath observance.

Their work will be carried on by the following four boards, of which they will become departments:
Board of foreign missions.
National board of missions.
Board of Christian education.
Board of ministerial relief and sustenance.

Remainder Adopted

The remainder of the Stone report, entailing a reduction of the agencies of the Presbyterian church in the U. S. A. from 16 to 4, and the creation of a general council to take over the functions of executive commission and the New Era movement, was adopted in its entirety, by the 134th general assembly.

According to the constitution of the church, the section relating to the general council must be voted on by the Presbyteries.

The Rev. Gustav Briegleb, Pasadena, Cal., pastor and movie censor of the Pasadena, presented an appeal to be followed in the censorship of motion pictures as follows:
"Elimination of women in abbreviated costumes.
No scenes of drinking or smoking by men or women and no dancing scenes.
Abolition of all 'triangle' plays and all scenes dealing with inharmonious home life.
A ban on crime or underworld film scenarios.
Elimination of all death bed 'agonies' scenes.

Boycott Planned

A boycott by the general assembly to be maintained by all constituents of the Presbyterian church against all theaters presenting 'pictures that are suggestive and unclean' was recommended by the board of temperance and moral welfare. Certain interests in the motion picture industry it is charged, in screen presentations 'make light of marriage, woman's virtue, the Lord's day, the 10th commandment and chastity, thus spreading a moral blight across America and striking at the vitals of the nation in suggesting to the youth of the land ruinous habits.'

Existence of a well organized opposition to all efforts to 'cleanse a city of a vile picture,' and the entrance of the film industry into politics to prevent election of hostile candidates, are also alleged in the report.

Debarment of all actors and actresses of notorious and unsavory moral reputation, and intemperate habits was also urged.

BILL IS AIMED AT FOREIGN LIFE INSURANCE CO.'S

Copenhagen, May 25.—The Danish home secretary is about to introduce a bill in the Rigsdag to the effect that foreign life insurance companies in future are to invest the premium reserve of their Danish policies in Danish currency.

The existing laws require only a cash deposit of 100,000 kroner (about \$20,000), to transact life insurance business in Denmark but there is some apprehension that the present exchange position may so develop that those foreign companies, having invested heavily in other currencies, may be unable to shoulder their responsibilities toward their Danish policyholders.

Million Dollar Oil Fire

More than \$1,000,000 loss was suffered when fire, caused by lightning, swept the Tula Water Oil Company refinery, Bayonne, N. J.

The home secretary thinks it a wise course to adopt to stipulate that foreign companies always have the necessary kroner enabling them to meet the claims of their Danish policyholders immediately.

It is expected that those foreign life insurance companies already represented here, if they do not wish to immediately arrange for the necessary deposits, will get ten years time to bring their deposits up to the amount of their premium reserve for Danish policies.

If any of the companies are unwilling to meet the requirements of the new law, the Danish life insurance council can withdraw their permit to write new insurance here, and can take over the administration of the existing portfolio.

The committee appointed to consider the home secretary's bill has further proposed that the life insurance companies in future must publish a full list of their investments.

MISS DOWNEY TO DELIVER ADDRESS IN NEW YORK

Miss Mary Downey, director of the North Dakota Library Commission will be one of the speakers of the National Federation of Women's clubs sessions at Chautauque, New York, some time during the session beginning there June 21. Following this meeting she will return to Detroit for the annual convention of the American Library association and then will return to Chautauque, New York, where she will be at the head of the library school in session there for the months of July and August. Miss Ellen Hedrick of the historical department of the North Dakota library will be one of the teachers also during the two months of the session.

This week, Miss Downey is speaking before the Lake District Library association at Moorhead, Minn., a meeting to which all of the librarians of the eastern part of North Dakota are invited.

Plans for the work of the coming year have been perfected by Miss Downey and these plans will be started on the way to realization when she returns here at the beginning of September. She is of the impression that the work of the traveling libraries has been so extended this year that the libraries of the association will be in demand all of the time during the coming winter months. Miss Downey is also planning to establish an aid

READ CAREFULLY FOR SALE Home and Furniture

House of six rooms, city water, cistern, East front, nice porch, large lot. I am also offering at the same price, nice coal range, a parlor heater, "A WALNUT DINING TABLE," three beds, sagless springs, and other household goods too numerous to tell you about. Oh, by the way we put hard wood floors in this house two years ago—down stairs.

This cozy little house is located at 1014 10th street. Do you understand that the street car line when extended "round the loop" is surveyed to run up 10th street. Of course dear prospective buyer I am NOT trying to use this as a seductive argument to have you buy this property, the car line extension is only anticipated and nothing guaranteed. Of course nothing in this world is guaranteed, except death.

The Boulevard, which the state intends to beautify is close by. The price of this property, home, lots and all the furniture is only \$1850.00. First payment \$400 to \$600.

Soldiers BONUS taken and credited at face value, EXCEPT that I will charge you 7 per cent until bonus is paid. This is a real bargain. All inquiries answered in a polite way, and property shown with pleasure. Hurry. Let's go. This nice property is offered for sale only by,

MRS. HILLIANS PRAISES N. D. NIGHT SCHOOLS

Although 63 Years of Age,
She Was a Pupil
Last Winter

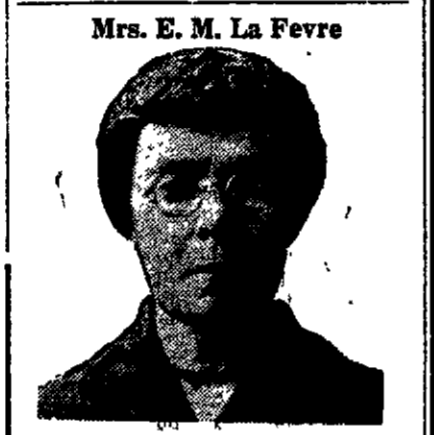

Kulm N. D., May 25.—The dramatic incident of the meeting of the Sixth District Women's club convention here was the appearance of Mrs. Hillians to tell of the work of the Kulm Night Schools. Mrs. Hillians is sixty-three years of age, a resident of the state for thirty-seven years, and her story of the night school was the story of learning to read in any language for the first time. She was a student in the night schools at Kulm last winter.

Mrs. Hillians was not on the scheduled program of the meeting. Her story came to the ears of one of the delegates interested in the problems of the Night School however and she was asked to appear.

She told her story willingly, delighted that at this late hour in her life she had been able to master the reading language of her adopted country and proud of the fact that she had stood at the head of her class, ranking one hundred in each of the final examinations given.

She presented herself as an ardent advocate for North Dakota's night schools and declared to the Federation of Women's Clubs representatives that next year she would be both an emissary and a liaison officer to see that every one in Kulm that could not read or write became a student in the schools during the coming year. The night school of last winter, was her first opportunity, she said, for such instruction.

She has continued her reading, getting books from a library to which an eight year old granddaughter has access and in study with the granddaughter has progressed so rapidly that she can read more rapidly than the girl, reared in the schools of this country. One of the greatest joys of

Mrs. E. M. La Fevre

Are You in Middle Life?

This is Vital to You Read it
Minneapolis, Minn.—During middle age I suffered from a woman's weakness. Thru this I became all run down and extremely nervous, suffered with dizzy spells and was so weak I could scarcely comb my own hair. I had practically an invalid for a whole year and could not seem to get help. I knew of Dr. Pierce's medicines and decided to take his 'Favorite Prescription' and also the 'Golden Medical Discovery' and by the use of these medicines I was relieved of all my weaknesses and restored to perfect health so I could do all my own work.—Mrs. E. M. La Fevre, 351 13 1/2 Ave., N. E.

Your neighborhood druggist can supply you with Dr. Pierce's famous remedies, in tablet or liquid form.

"Fifi's" Daughter

Anne Stillman, daughter of Mrs. "Fifi" Stillman, has arrived from France and may testify in her mother's divorce suit. Note marked resemblance to mother in this latest picture.

both Mrs. Hillians and her daughter is that they can now write directly to each other, the daughter previously having to write to a neighbor to get word to and from her mother.

IMPORTANCE OF IRRIGATION IS RECOGNIZED

Damage Being Done by Floods
Of Lower Mississippi River
Largely Responsible

Because of the present damage being accomplished by the floods of the lower Mississippi river, the importance of the coming North Dakota irrigation conference, which in reality is an attempt to impound much of the water of the early spring freshets for use in agricultural pursuits, is being recognized in all parts of the country where the problems of the flood waters reach.

Some idea of the damage accomplished and of the vast amount of water that has swept down the Father of Waters can be reached when it is considered that the Mississippi reached bank full on March 27 and that on May 24, a month and twenty-six days later, an area almost the equal of the state of North Dakota was under water in the territory above New Orleans.

The flood has demonstrated that the building of levees cannot restrain sustained floods.

The building of levees has been in

progress since 1832, according to Col. Charles L. Potter, at present in charge of the army work. The first beginning of levees, however, was made by the French who built up earth banks along the Mississippi to protect New Orleans as early as 1717. These, extended fifteen or twenty miles up the stream.

Col. Potter predicted at the beginning of the present flood that the levees would stand, especially those on the lower stretches of the river, the place where the breaks have been the most numerous.

Col. Potter at that time took the position, however, that the work would never end, that the work of fighting the floods of the river would go on forever. The windings of the stream were cited by the colonel as the reason why a system of dykes could not be made permanent.

With the Missouri at flood stage at the present time, and with the usual June raises still in prospect, the Irrigation Congress may have a good object lesson of the vast amount of water, later needed in the fields of the western part of the state that is constantly rushing onward to add itself to the destructive powers of the lower Mississippi.

One of the latest inventions is a self-playing cornet.

OTTO HUE WAS "THE MAN OF THE PEOPLE"

His Death a Distinct Loss To
Working Men of Ger-
many

OF UNDAUNTED COURAGE

Essen, Germany, May 26.—Otto Hue, whose death occurred here recently was the recognized leader of the coal miners' and iron workers' trade unions, whose memberships runs into millions.

Lean and active, with his drooping red mustache and his slouch hat he looked more like a Sunday school inspector than the leader of a great party. He was a Social Democratic member of the Reichstag, the Prussian Diet and the Economic Parliament.

He represented labor on the German delegation to the Spa conference, and it was mainly through his instrumentality that the stipulated coal deliveries to the Entente were upheld.

He showed his breadth of mind on this occasion by taking his stand side by side with Stinnes, the great coal magnate, to whom he was on almost

FIRE FIGHTER'S REPORT TELLS FACTS IN CASE

Hale Suffered Day And Night
With Rheumatism, But Tan-
lac Overcome His Troubles,
He Declares In Strong State-
ment.

"I think Tanlac is the best medicine made, and it is the only thing that ever helped me," declared Frank M. Hale, 1101 7th St., South Minneapolis, Minn., a popular member of the fire department.

"I suffered five years from rheumatism and stomach trouble. I had practically no appetite at all, and the little food I forced myself to eat would sour, gas filled me and made my heart palpitate so it nearly cut off my breath. Rheumatic pains in my back and limbs wouldn't let me sleep well, and I got so I just could get about.

"My troubles began to leave almost as soon as I started taking Tanlac on a friend's good advice. Now I eat heartily of anything I want sleep well, and my rheumatism is gone entirely. I never felt better and I think Tanlac deserves all the praise it gets."

Tanlac is sold by all good druggists.

every other point mortally opposed, but as he himself said, fire and water were for once working toward the same end.

Hue always remained the man of the people. He preferred to speak low German, thus endearing himself to the mining population. Once after addressing a miners' meeting, he sat down on the platform, took a four-pound country loaf and an enormous miner's knife out of his pocket and calmly munching slice after slice to the huge delight of the spectators. "He is one of us," they said.

Hue was a man of undaunted courage. In 1920, during the Red disturbances in the Ruhr district, a price was put on his head, for he was a noted anti-Bolshevist, and he was virtually compelled to leave Essen. He was gone for just six hours, after which he returned, showed himself on the streets, and finally went to the very headquarters of the Reds and expressed himself fully concerning their activities. He remained in Essen and kept the German government informed of the Red movements, even when he was obliged to incriminate his personal friends.

The weight which Hue carried in labor councils insured his selection as a member of the German delegation to the Genoa conference, but he remained behind, stricken with inflammation of the lung, which took a fatal course.

DUNN CENTER TO HAVE NEW TRAIL

Road Into Scenic Bad Lands Is
Planned by Boosters

Dunn Center, N. D., May 26.—That Dunn Center will soon have a real Badland's Trail is now an assured fact. A meeting of businessmen and farmers in Dunn Center and vicinity has been called at the Dunn Center Auditorium on May 23, at 2 o'clock p. m., at which time the Dunn Center-Badland's Trail Association will be organized.

Immediately thereafter the new trail will be blazed and work started to put the trail in shape for travel at earliest possible date so that tourists who may wish to take this side trip this summer can do so and it

**A Clever, Dainty, Con-
venient Undergarment**

You will be delighted with this lovely undergarment, which combines the chemise and knicker and eliminates bulkiness at the waist line.

It has a deep seat and closed crotch affording wonderful convenience and protection.

It is fashioned to conform with the lines of figure.

This most convenient, practical, dainty undergarment is cool and comfortable—just the thing for Spring and Summer.

Mfd by Sterne & Klein Co., Chicago

will indeed be a trip well worth taking.

The first seven or eight miles of this trip takes one through a stretch of the best farming country in the state. Also by the William Connolly Ranch home. Three to four miles into the Badlands the rugged Little Missouri is reached. Its banks are amply covered with shade trees and the water is clear and has a clean sandy bottom, which makes swimming a very desirable pastime. Fishing is also good in season.

The Badlands to the North of Dunn Center are noted for their beautiful scenery, often being referred to by outsiders as the Grand Canyon of North Dakota. During berry and fruit season there is an abundance of the best that mother nature can produce in that line. Wild birds and animals, the eagle, coyote, antelope and deer are still quite plentiful and oc-

asionally a timber wolf and a mountain lion is seen. The travelers are never molested by them.

"If you wish to see nature just as God-Almighty made it, take this trip. Many people even living here in Dunn Center do not realize that they reside only ten to twelve miles from one of the finest camping places in the world. After this trail is completed this new drive will only take about thirty minutes from Dunn Center," said a Dunn Center booster for the trail.

William Connolly who has ranged this country for years advises that then ew trail can be made with but little expense.

Dance every Tuesday, Thurs-
day and Saturday evenings at
8:30 at The Coliseum. 10 Cents
per dance.

So extra delicious With fresh fruits

No other food has such an appeal on a hot day as Kellogg's Corn Flakes! They win fickle appetites, they satisfy hungry folks! As an extra-summer taste thrill, eat Kellogg's with the luscious fresh fruit now in season. Such a diet is not only ideal from a health standpoint, but it is refreshing!

You can eat Kellogg's Corn Flakes liberally at any meal because they digest easily. Let the children have all they want.

Insist upon Kellogg's Corn Flakes in the RED and GREEN package that bears the signature of W. K. Kellogg, originator of Corn Flakes. None are genuine without it!

SWEDEN WILL RECOVER FROM POST-WAR ILLS

With Deflation and International Liquidation Still Under Way, Krona is at Par

SUFFERS "BUYER'S STRIKE"

Sweden is Also Severely Handicapped Because of Her High Exchange Rate

Stockholm, May 26.—Sweden's complete future recovery from a series of painful operations for post-war ills is forecast in the official economic report of the Swedish Foreign Office Commerce Department just made public. Its principal note of optimism is the Swedish exchange. After a year and a half of deflation and international liquidation still under way, the Swedish krona is virtually at par.

The government experts find that the greatest obstacles to economic recovery lie in the competition of countries with depreciated currency and in the fact that wages have not yet been sufficiently reduced. Countries with low exchange can dump goods in Sweden at prices against which Swedish manufacturers cannot compete. Likewise, in the foreign markets, Sweden is severely handicapped because of her high exchange rate.

The report states that there is a strong tendency toward revival in many lines of industry but that the natural process of building up is delayed by unsettled conditions in central and eastern Europe, the monetary troubles and the unemployed process of wage adjustment.

The foreign office finds that during the second half of 1921 and the first quarter of this year there was observed a slight increase in the activities of Sweden's basic industries accompanied by expansion in foreign trade, especially in timber, pulp and paper.

Although great interest has been shown in an early return to the gold standard, the foreign office reports that doubts have been expressed of the wisdom of adopting the American dollar as basis of parity, as suggested by some financial experts.

Bank Savings Show Drop

Bank savings and deposits show a marked drop during the first quarter of the year. This is attributed to consumption of capital during the period of depression.

Never has the stock exchange witnessed such a drop in values of stocks, the market having been affected, says the report, by the heavy losses suffered by industrial corporations and the non-activity of others.

Sweden is still suffering from a buyer's strike, which accompanied the slaking price level and most industries are working on a scale of one-third to two-thirds capacity.

The signs of improvement in unemployment are weak. However the number of unemployed is going down. There were 153,700 jobless on January 31, and only 156,000 idle at the close of February and unemployment continues to decrease. Of these more than 65,000 were receiving government aid.

The report emphasizes that although large cuts in wage scales have been made real wages—that is wages compared with cost of living—are still above pre-war standard and must be lowered further. This held to be likely in view of the cuts in the United States and England.

ELECTRIFIED MODEL FARM IS NOW ASKED FOR

Swedish Government May Establish Such a Farm Near Stockholm

Stockholm, May 26.—The Swedish government has been requested to establish a model electrified farm to be located, if possible, near Stockholm.

In view of the fact that more than one-third of agricultural Sweden is now electrified, it is proposed that the model farm be as nearly 100 per cent electrically operated as possible so that Swedish farmers, who are now in a position to change horses for electric power, may be enabled to view demonstrations of how "white coal" can be utilized in the country.

The request for the electrified model farm comes from the National Association for Electrification of Rural Sweden. In its communication to the government this body points out the necessity for training Swedish farmers in making use of electrical power. It proposes that farm electrification be made a special subject of study at the agricultural schools and colleges of the country.

It is proposed that the model farm be fully equipped with all the latest electric agricultural devices, so that the farmers may see electrically operated plows, mowers, seeders, harrows and threshing machines. Motors of different sizes will drive the milk separators and the churn. The new electric device which passes an electric current through an ensilage of cattle fodder to increase its nutritive value is to be shown.

There is very little heavy labor on Swedish farms, heretofore performed by man or beast, which machines operated by electric current cannot do, and more than a third of the Swedish farmers can operate their farms by electricity if they understand the elementary principles of electrical science. Naturally, the agricultural population needs considerable training before full advantage can be taken of the wonderfully cheap power furnished by the many waterfalls and rapids which have of late been harnessed.

"SERVANT IN THE HOUSE" PLAY THAT HAS WON FAVOR OF MANY CRITICS

So long as some men succeed and others fail, so long as some have wealth and others poverty, will the world be subject to the criticism which may be found in Charles Rann Kennedy's "The Servant in the House," which Walter Hampden and his company are presenting on Friday night, May 26th, at the Auditorium.

In "The Servant in the House," Kennedy has sought in an allegorical drama, to call attention to foolish ambitions and to heap harsh criticism upon those who bow down and worship material gods, hide behind the mask of hypocrisy and fall in their adherence to the doctrine of the brotherhood of man.

Some twelve years ago, this play was the dramatic sensation of the season, with Hampden originating the part of Manson and which he played

CORN CONTEST IS PROMOTED

Beulah, N. D., May 26.—A 20-acre corn contest will be conducted by the Beulah Commercial club. Three judges will be chosen by the Commercial club to award the prizes in the fall. Rules of the contest follow:

1. Select seed corn that will mature in Mercer county, such as: Rustler White Dent, North Western Dent, Minn 13, and early Flint varieties.
2. Seed corn must be tested for germination. Corn that tests below 85 per cent should not be planted.
3. Corn should not be planted later than May 20th, and the method of corn culture taken up with the county agent.
4. Only bona fide farmers in the immediate vicinity of Beulah, whose railroad station is at Beulah, can enter this contest. No fee is charged for entering this contest.
5. The contestant agrees to plant 10 acres of sweet clover. (Prizes are to be given on sweet clover in 1923), in the spring of 1923 on the part of the 20-acre corn field.

There will be donated by the Commercial club \$150 cash.

This amount will be divided into three prizes: First prize \$75, second prize \$50, third prize \$25.

Fields will be judged on the following basis:

Twenty best-ears (shown at the fair), 50 per cent. Cleanliness of field, 25 per cent. Yield, 15 per cent. Stand and general appearance, 10 per cent. Total, 100 per cent.

CORNS

Doesn't hurt a bit! Drop a little "Freezone" on an aching corn instantly that corn stops hurting, then shortly, you lift it right off with fingers. Truly!

Your druggist sells a tiny bottle of "Freezone" for a few cents, sufficient to remove every hard corn, soft corn, corn between the toes, and the calluses, without soreness or irritation.

CHILDREN ARE "DOPED," SAY U. S. RESIDENTS

Many Found in Hovels and Cellars Suffering From Native Narcotic Solution

TO "KEEP THEM QUIET"

Constantinople, May 26.—American residents here are aroused by discovery that scores of refugee children are being kept in "doped" condition by women who make a living day nursing them while their mothers work for bread.

Nearly 1,000 of the children have been found in hovels and cellars after having been given a native narcotic solution to keep them quiet. In this city sleeping potions are sold by street criers and the women had resorted to the plan of stupefying the children so that their own work would be uninterrupted.

Led by Mrs. R. S. Emrich of Frankingham, Mass. an American Near East official, five American women have formed a committee to stop the condition of affairs which they say is producing drug addicts. Mrs. Bie Rayndal of Fillmore county, Minn., wife of the American consul general is chairman of the committee. Two resident representatives of the Jewish welfare society are members.

A survey by the Massachusetts woman showed that refugee widows, who had been helped to find employment by the relief organization, were compelled to leave their children for a small fee a day in the hands of women who herded them in groups of 10 to 15 in cellars and huts. Mrs. Emrich found children sitting stupidly on water-soaked dirt floors in danger of developing tuberculosis as well as suffering from drug effects. Their ages ranged from one and a half to four years.

Rooms have been opened by the committee, which is hoping for American contributions through generous people for maintaining a modern place and nurses to care for this new phase of the refugee problem.

SOCIETY IS NON-EXISTENT IN BERLIN

Majority of Old Prussian Aristocracy Have no Desire to Mix With The "Newly Rich"

Berlin, May 26.—In a social sense, President Friedrich Ebert is probably the most retiring chief of any European democracy.

Society, as it is understood in other capitals, is non-existent in Berlin. The great majority of the old Russian aristocracy have withdrawn to the seclusion of their country estates. They have no desire to mix with the "newly rich," and the new order of things is frankly repugnant to them.

Visitors are few at 78 Wilhelmstrasse and no country cousins stop to wape at the old palace of the erstwhile court marshal which the Presi-

dent of the German republic has made his home.

Rarely is the ex-saddler seen or recognized in public and picture postals of members of the Hohenzollern family are more plentiful in stationery stores than those of Fritz Ebert.

A formal reception at the presidential residence is therefore something of an event in Berlin. For the first time, Herr Ebert the other evening entertained about 100 of the most prominent German citizens who have made their peace with the present regime, or nearly so.

Besides cabinet ministers and chiefs of departments, there were university professors, poets, sculptors, musicians, painters, actors and authors.

President Ebert, welcoming his guests, spoke of his desire to meet personally the present leaders of thought, arts and sciences of the fatherland and dwell on the importance such gatherings would have in fostering culture which he conceived it was the task of the new republican regime sedulously to promote.

Professor Adolf von Harnack, theologian, delivered a short allocution on the ancient conception of charity, and Konrad Ansoerg, eminent pianist, played Beethoven's Appassionale.

The president is a cheerful host, and his first social evening is said to have been a complete success.

ANNOUNCEMENT

I hereby announce myself as a candidate for the office of County Auditor of Burleigh County at the June 1922 Primaries.

H. A. Thomas, Jr.
Driscoll, N. D.

That From These Honored Dead We Take Increased Devotion

Honor With Flowers Those Gone Before

Memorial Day is the day of Tribute to those who have gone before. We have provided a Great Variety of Flowers, Plants, Wreaths, for this time. We ask you to make your selections early.

HOSKINS-MEYER

Flowers Speak a Language of Their Own.

Doctor at 82 Finds Mothers Prefer His Formula to New-Fangled Salts And Coal Tar Remedies for Babies

Judgment of 1892 vindicated by world's approval of Dr. Caldwell's Syrup Pepsin, a simple vegetable compound for constipation—So safe thousands give it to babies in arms—Now has largest sale in the world.

WHEN a man is in the 83rd year of his age, as I am, there are certain things he has learned that only time can teach him. The basis of treating sickness has not changed since I left Medical College in 1875, nor since I placed on the market the laxative prescription I had used in my practice, known to druggists and the public since 1892, as Dr. Caldwell's Syrup Pepsin.

Then the treatment of constipation, biliousness, headaches, mental depression, indigestion, sour stomach and other indispositions that result from constipation was entirely by means of simple vegetable laxatives, herbs and roots. These are still the basis of my Dr. Caldwell's Syrup Pepsin, which is a combination of Egyptian Senna and other mild laxative herbs with pepsin.

Recently new medicines have been brought out for constipation that contain calomel, which is mercury, salts of various kinds, minerals, and coal tar. These are all drastic poisons, many of them dangerous, and the medical profession

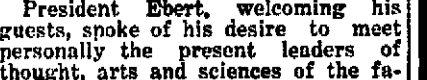

is warning the public against them. Certain coal tar products will depress the heart; certain salts give rise to intestinal poisoning, impaction and rupture of the intestines. If grown people want to use them no one can deny them the privilege, but they should never be given to children.

The simpler the remedy for constipation, the safer for the child and for you, and the better for the general health of all. And as you can get results in a mild and safe way by using Dr. Caldwell's Syrup Pepsin, why take chances with pills and powders and strong drugs, even if disguised in candy? My remedy, too, costs less than most others, only about a cent a dose. A bottle such as you can find in "my drug store," will last a family several months, and all can use it. It is good for the babe in arms because pleasant to the taste, gentle in action, and free from narcotics. In the proper dose, given in the directions, it is equally effective at all ages. Elderly people will find it especially ideal.

The formula of Dr. Caldwell's Syrup Pepsin is on the cover of every bottle, and the ingredients have the endorsement of the U. S. Pharmacopoeia.

In remembrance of my 83rd birthday I have set aside the sum of Ten Thousand Dollars to be given away in half-ounce bottles of my Syrup Pepsin. Only one Free Trial bottle to a family. All are constipated now and then, and here is an opportunity for you and others to try Dr. Caldwell's Syrup Pepsin FREE OF CHARGE. Ask for your free bottle today, simply sending name and address to Dr. W. B. Caldwell, 514 Washington St., Monticello, Ill. Do not postpone this.

\$10,000 Worth of Syrup Pepsin Free

From a recent portrait of DR. W. B. CALDWELL, Founder of Dr. Caldwell's Syrup Pepsin, Born Shelbyville, Mo., 1839

is warning the public against them. Certain coal tar products will depress the heart; certain salts give rise to intestinal poisoning, impaction and rupture of the intestines. If grown people want to use them no one can deny them the privilege, but they should never be given to children.

Elderly people will find it especially ideal.

The formula of Dr. Caldwell's Syrup Pepsin is on the cover of every bottle, and the ingredients have the endorsement of the U. S. Pharmacopoeia.

In remembrance of my 83rd birthday I have set aside the sum of Ten Thousand Dollars to be given away in half-ounce bottles of my Syrup Pepsin. Only one Free Trial bottle to a family. All are constipated now and then, and here is an opportunity for you and others to try Dr. Caldwell's Syrup Pepsin FREE OF CHARGE. Ask for your free bottle today, simply sending name and address to Dr. W. B. Caldwell, 514 Washington St., Monticello, Ill. Do not postpone this.

is warning the public against them. Certain coal tar products will depress the heart; certain salts give rise to intestinal poisoning, impaction and rupture of the intestines. If grown people want to use them no one can deny them the privilege, but they should never be given to children.

The simpler the remedy for constipation, the safer for the child and for you, and the better for the general health of all. And as you can get results in a mild and safe way by using Dr. Caldwell's Syrup Pepsin, why take chances with pills and powders and strong drugs, even if disguised in candy? My remedy, too, costs less than most others, only about a cent a dose. A bottle such as you can find in "my drug store," will last a family several months, and all can use it. It is good for the babe in arms because pleasant to the taste, gentle in action, and free from narcotics. In the proper dose, given in the directions, it is equally effective at all ages. Elderly people will find it especially ideal.

Social and Personal

Local Daughters Take in Twelve New Members

The Bismarck branch of the Catholic Daughters of America was given warm praise last night by Mrs. E. N. Smith, of Fargo, grand regent of the order, who was the guest of the local lodge at its regular meeting and initiation last evening.

Mrs. Smith was paying her official visit to the local lodge and gave an inspiring address. She spoke of the work of the order and complimented the Bismarck daughters on the work accomplished.

Junior Nurses Are Hostesses to Seniors

The members of the Junior Class of the Bismarck Hospital Training School entertained the members of the Senior class at the annual Junior-Senior banquet held at the Grand Pacific hotel last evening, at 8 o'clock. Covers were arranged for ten Seniors and eleven Juniors.

Alumni Banquet Given Last Night

The St. Alexius Alumnae Association were hostesses to members of the St. Alexius Hospital Graduating class at a banquet at the Grand Pacific hotel last evening. The class colors, gold and green, were prettily carried out in the table decorations.

CLUB CLOSES SEASON

The last meeting of Woman's club will be held at the home of Mrs. C. B. Whitney, 622 Sixth street, Saturday afternoon. As this is the last meeting of the club year, important business will be taken up. New members who have been voted into the club for the ensuing year will be present. Each member of the club will make a report on some current happening. The program for the afternoon includes:

Roll call from Keats. Life and works of John Keats by Mrs. E. B. Gorman. Review of Hyperion by Mrs. Paul F. Ryan. Reading—"The Eve of St. Agnes," by Mrs. A. C. Wilkinson.

HOMESTEADERS DANCE

The members of the Homestead lodge will enjoy a dance at the K. of P. hall beginning at 9 o'clock this evening. Merchants have donated to the "fish pond," which is promised to be a feature of the evening's entertainment. Mr. and Mrs. Earl McElvain and Miss Murta Pearson are in charge of the arrangements.

MOONEY-MONTGOMERY

Miss Catherine E. Mooney of this city, and Merle Montgomery, son of Mr. and Mrs. J. A. Montgomery, were united in marriage at the home of the bridegroom's brother, Frank Montgomery, Thursday evening by Judge I. C. Davies. The young people will make their home on the farm of Mr. and Mrs. E. A. Green, where Mr. Montgomery is employed.

GIVE SURPRISE PARTY

On Thursday evening, May 25, about 30 friends of Miss Lucy May Snyder surprised her, the occasion being her 19th birthday. Games and guessing contests were enjoyed during the evening after which dainty refreshments were served. Miss Snyder received many lovely gifts.

"GOODIES" FOR SUNDAY. The food sale of St. Mary's sewing circle will be held tomorrow afternoon at the Bismarck Motor company on Broadway, three doors east of Finney's Drug Store. There will be all kinds of "goodies" for your Sunday dinner.

TO AWARD PINS. F. A. Knowles, of the Knowles Jewelry store, has announced that he will award a diamond pin to the valedictorian of each graduating class of the Bismarck high school. The offer was accepted by the faculty of the school.

COUNTRY CLUB PARTY. The entertainment committee of the Country Club has arranged for another informal dance for its members on Tuesday, June 6, Saturday evening from 8 to 12. Wagner's orchestra has been secured for the evening. Members entertaining guests that

Frequent Dips Help Keep Baby Comfortable

HE HAS HAD HIS BATH AND IS READY FOR HIS NAP.

BY MRS. MAX WEST. Late of the United States Children's Bureau.

When the baby frets and wails with discomfort after a long hot day, a bath will help matters wonderfully. In the hottest weather he may have two or three baths a day, without harm, if the bath is only a quick dip into tepid water and out again. No soap need be used in these cooling baths, and the whole process need take only a few minutes. The water should be at body temperature, neither hot nor cold. If it is a little baby, undress him, and holding him on the mother's arm and wet the whole body completely. Then lift him out into a large towel and dry the skin by patting, not rubbing.

If the baby is older and can sit alone, he may play and splash for a few moments. It is necessary to dry between the toes and in the folds and creases of the skin, and when thoroughly dry, a little dusting powder may be applied. The regular daily bath, usually given in the morning, being for cleansing, should be warmer, but never hot. Every mother should possess a bath thermometer and should regulate the water by it.

A little pure castile soap may be used, but when any sort of soap is applied to a baby it should be thoroughly rinsed off to avoid danger of irritating the tender flesh.

Other baths, useful in summer, are bran, starch and soda. To make a bran bath, fill a small cheesecloth bag with clean bran and soak and squeeze in the bath until the water is milky. Let the baby stay in the bath a few minutes, and the skin will be slightly coated with a thin paste which is soothing in case of prickly heat. A starch bath is made by adding a cup of cold cooked laundry starch to a gallon of water. The use and effect are similar to the bran bath.

For a soda bath, dissolve two table-spoons of cooking soda in a gallon of water. This, too, is soothing in a heat rash.

A sponge bath, meaning one in which the baby is washed off while lying on the mother's lap and not put into the tub, is better than no bath, but it is far better to use a tub. Any sort of clean pan will answer for a baby's bathtub, and in hot weather frequent dips will afford him no end of relief and comfort.

the guests of Mrs. Lidstrom's father, E. C. Taylor.

LEAVES FOR EAST

Mrs. L. O. Marden, of the city, left last evening for Worcester, Mass., where she will join Mr. Marden. Mr. Marden's mother and his son and daughter are visiting in New York. They will also go to Massachusetts, where the Mardens plan to make their home.

TO VISIT FATHER

Mrs. E. M. Stanton and little daughter, of the city, left last evening for Detroit, Michigan, where they will visit at the home of Mrs. Stanton's father, and other relatives. They expect to be gone about six weeks.

BISMARCK WOMEN GUESTS

Mrs. John L. Bowers of Mandan, entertained at 8 o'clock luncheon at her home yesterday. Mrs. B. K. Skeels and Mrs. J. M. Martin, of the city, were out of town guests.

TO SPOKANE

Mrs. Oliver Tharalson of Fargo, N. D., who has been visiting Mrs. I. H. Conrad, left this noon for Spokane, Wash., where she will join her husband.

ENJOY MOTOR TRIP

Mr. and Mrs. Heltemas and daughter, Miss Marie, Mrs. McQuillan and daughter, Miss Eunice, motored to Baldwin yesterday afternoon. They enjoyed a delightful return trip in the evening.

TO VISIT AT HAMPDEN. Miss Anna Johnson, who has been a guest at the home of Mr. and Mrs. J. P. Engen has left for Hampden, N. D., where she will visit before leaving for her home at Centerville, S. D.

TO ATTEND CONVENTION. Oscar Selvig, of the city, left last evening for Grand Forks where he will attend the state convention of the Disabled Veterans of the World War.

VISIT MOTHER HERE. Mr. and Mrs. Nick Reuter of Garrison were guests at the home of Mr. Reuter's mother, Mrs. John Reuter of the Rose apartments.

TO HOLD FOOD SALE. The ladies of the Swedish Lutheran Aid society will hold a food sale at the Cowan Drug store on Saturday afternoon.

ON BUSINESS TRIP. Dr. J. B. Hollenbeck, of the city, left this morning for Grand Forks on a business visit.

VISITING FATHER HERE. Mr. and Mrs. C. Lidstrom of Detroit, Minn., are visiting in the city.

THE STATE'S OLDEST NEWSPAPER
(Established 1873)

FOR REMEMBRANCE

No more graceful tribute can be paid to the American Legion boys than the wearing of a poppy. The poppy sale is becoming a national institution and affords funds to carry on a most worthy work. All of us owe it to the boys to make the sale a continued success. The distribution will continue for several days more and should be supported loyally.

There are disabled soldiers who need assistance as well as those who come and go unable to secure regular employment. The pittance which the price of a poppy represents is certainly a small contribution in remembrance of the great debt we all owe the Legion boys.

Everyone should be proud to wear the poppy and the money secured cannot be put to a better use than relieving those soldiers who faced death that the ideals of this nation might be preserved.

The wearing of a poppy shows too that the comrade who fell on Flanders fields and who now sleeps beneath the poppies of an alien land is not forgotten.

This beautiful custom should survive as long as there is a Republic in this land of the free and home of the brave. A small, graceful tribute if you will, but one of the little things that count so tremendously in an age when obligations to one's nation and her defenders are often treated too lightly.

Buy a poppy—then some more.

SENATOR McCUMBER'S POSITION

Voters of the state are doing some serious thinking these days over the senatorial situation. The ability of Senator McCumber to serve this state in the position he now holds is making a deep impression.

Mark Sullivan, a journalist of the first rank, in discussing the North Dakota situation in a recent article in the Worlds Work says:

"In North Dakota the June primaries will determine the succession to Senator Porter J. McCumber. Mr. McCumber is a candidate for the Republican nomination. He has the advantage of the natural state pride arising out of the fact that he is now chairman of one of the two most important committees of the Senate—that of finance. As such, Senator McCumber is a leading figure in the formulation of tariff and tax measures. It is a unique distinction for a state of comparatively small population, lying west of the Mississippi, to have such a representation in the centres of power in the Senate. Locally in North Dakota the politics of both parties, and especially just now of the Republican party, are so affected by the existence of the element which composes the non-Partisan League, that the complexities of the situation are too great to be more than merely alluded to within the present space."

Few states earn the distinction of having a senior senator preside over a committee which has to do with the great financial issues of the nation. Senator McCumber's position is a consideration to be weighed carefully by the voters in reaching their decision, June 28.

OTHER SIDE OF THE PICTURE

While those living in agricultural centers are prone to feel that they have been the sole victims of deflation and falling markets, it is interesting to note the balance sheets of some of the large corporations referred to by demagogues as "big business."

There has come to The Tribune a copy of the annual report of the Westinghouse Electric and Manufacturing company which reflects very well the stern fact that deflation has been working all down the line from the farmer through every industrial unit that contributes to the mighty channels of trade.

A condensed comparative statement of operations of Westinghouse for the past six years shows this situation: In 1917 the corporation showed gross earnings or sales billed of \$89,589,442. The cost of these sales in that year was \$72,977,752 and the net income for dividend purposes was \$18,079,889.

For the fiscal year ending March 31, 1922, the gross earnings or sales billed amounted to \$99,722,026. The cost of handling this business on a rapidly falling market was \$93,461,846 and the net income for dividend purposes on a larger volume of business than in 1917 was \$5,837,389.

One other large corporation reported gross sales of more than \$150,000,000 with a loss of \$32,000,000.

While people who reside in agricultural states are given to lament their losses due to deflation,

it is helpful and instructive to know that the same process is going on around them in every shop, factory and farm. But the turn in the corner has been made. The severe drop in prices economists tell us has been reached and while bottom has not been hit, the reduction will be more gradual and orderly than during the last eighteen months. There is a general feeling of optimism abroad everywhere and an indication at least that the severe pangs of deflation have passed and that all forms of business will surge ahead with renewed vigor. Unemployment is not as serious and there are evidences that business is renewing in greater volume its regular functions. Stocks have been reduced and losses taken so that conditions upon which to build toward better times are more favorable than in months, if the students of business are correct in their diagnosis.

IRRIGATION CONFERENCE

North Dakota, Montana and South Dakota should unite in an effort to control the flood waters that are diverted every spring and work havoc in states to the east and south. The New Orleans Association of Commerce is keenly alive to the practical solution of flood conditions through control of the surplus water at the source.

A letter written by Harold W. Newman, president of the New Orleans Association of Commerce, urges that the federal government investigate the feasibility of utilizing this flood or surplus water in the various states, chief of which are North and South Dakota and Montana. One very significant paragraph in this letter which has been printed in the Congressional Record reads:

"We are assured by men who have made a study of Missouri River conditions that a great deal of surplus flood waters which now reach the Missouri from its source streams can be diverted and soaked into dry lands far removed from the Mississippi. In this way untillable lands may be made available for agriculture, and the flood flow of the Missouri be brought under some sort of control, to the end that in times of maximum flood flow there will be a reduced peak load of the Ohio at Cairo."

The association under whose auspices the Irrigation Congress will convene in Bismarck June 7-8 believes that the New Orleans Association of Commerce has given a new slant to the entire problem of flood control and its relation to irrigation as far as North Dakota is concerned.

Senator McCumber is now compiling statistics showing just what money will be available from the sale of public lands in North Dakota for irrigation and reclamation projects. The advisability of securing the appointment of a federal commission to come to this and neighboring states to work out a plan will be considered at this congress.

Businessmen of the state and farmers as well are urged to attend the congress as the deliberations will be of great importance to the economic future of this section as well as the entire state.

Commercial clubs have entered into the project enthusiastically and a program is now in process of preparation which will prove interesting to the delegates. Rates into the city have been secured and the congress should serve to focus attention upon the necessity and the feasibility of a scheme to irrigate many acres which are now barren.

HEREAFTER

The ex-kaiser is reported to have lost all interest in European politics. His physical health is said to be good. But his friends are worried about his mental state. They say his devotion to religion has become a mania.

Wilhelm is 63 years old. At that age men begin to think a lot about the hereafter.

In the inferno, Wilhelm will have a fine time exchanging notes with Genghis Khan, history's champion butcher, who in 12 years of conquest killed 18,500,000 Asiatics. Other millions were killed in his lesser wars.

In the year 1227 he was destroyed by death, always the final victor. Wilhelm fears this ultimate conqueror. There's a reason.

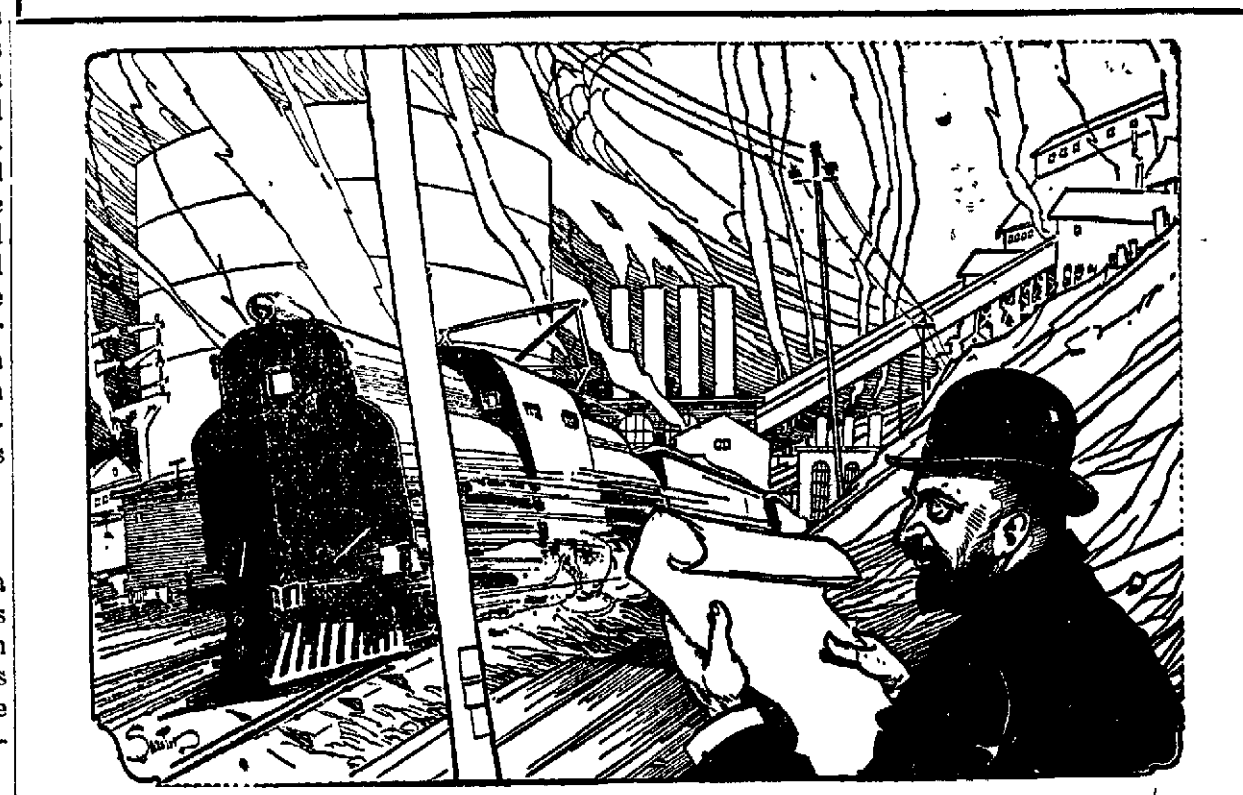

EDITORIAL REVIEW

Comments reproduced in this column may or may not express the opinion of The Tribune. They are presented here in order that our readers may have both sides of important issues which are being discussed in the press of the day.

FOR McCUMBER

Mr. Ormsby McHarg, who is also a candidate for United States senator, is sending out a long statement and platform. All of it contains much truth, but at this time we fail to see where it is going to get the gentleman from Stutsman county anywhere. The Jamestown convention settled all these questions—or at least it was thought that it did—and at this time and under present conditions we feel that Mr. McHarg had better drop out of the race. There is absolutely no chance for him to make a respectable showing at the primaries in June and his remaining in the race only means the probable defeat of McCumber and the nomination of Frazier in the June primaries. Looking at the two men as to capability and also the prestige McCumber has attained in the senate of the United States it should not take the average voter very long to make a decision between the two men when he gets into the election booth to vote on June 28th. This paper was opposed to McCumber at the Jamestown convention but as between the two leading now running for the job—McCumber and Frazier—we are certainly for the former.—Valley City Times-Record.

STINNES GETS CITIES' FUNDS

BY MILTON BRONNER
European Manager for NEA Service

Berlin, May 26.—"Every little planing added to what you've got makes just a little bit more," seems to be the favorite motto of Hugo Stinnes, the uncrowned king of German business.

Like some of our own American business men, he early found the formula—convert coal into gas or electric power or set it to pumping water and you will soon have entire communities pouring their money into your coffers. There are syndicates in America in which own and control all kinds of public utilities, but it is doubtful whether any of them found such a fat field as Stinnes has discovered.

The far-famed Ruhr region is peculiarly fitted for syndicated control. Ruhr is ideal location.

The coal is right there in the Ruhr. It doesn't have to be hauled for miles before being available. So coal is cheap. In the next place the Ruhr valley and the neighboring country is studded with large heavy manufacturing towns in which most of the people are workers either in mines or steel and iron mills. Consequently they are highly paid laborers, live in comfortable homes and want all the conveniences of electric lighting, abundant water supply, and gas for cooking purposes. Furthermore, the entire region is a network of street car systems and of electric narrow gauge railways which haul material from mill to mill.

Twelve years ago Stinnes became active in forming several companies to undertake this public utility and as usual with Stinnes concerns they were finally combined into the big Rhensch-Westphalian Electric Works Corporation.

Its present field is enormous. It covers a region from the Dutch frontier as far south as Ahrdt and is especially strong around Dusseldorf, Cologne, Dortmund, Essen and Bochum. In several places its electric power plants actually stand at the edge of coal fields, so the fuel goes from pit to boiler.

Gets Cities to Invest
The electric plants not only supply lights for many cities of the Ruhr and for the illumination of mines, but also the power used in the street railways, most of which are owned and operated by the municipalities. Stinnes cleverly got the town fathers to invest municipal money in the Rhensch-Westphalian.

Thus the towns have a decided interest in the business of the corporation. As consumers they buy electric current for their street lighting and their street railways. As stockholders they participate in the considerable profits of the company. This is true of big cities like Essen, Mulheim, Ruhrort, Solingen, Gelsenkirchen, and all the other steel towns of which one heard so much during the war.

The company has also gone extensively into the gas business. In the past ten years it has erected and still owns gas plants for about 25 cities in the Ruhr region.

Acquires Lignite
It also constructed and partly owns a considerable number of water reservoirs. The far-seeing Stinnes also brought into the concern the big lignite company of Bruehl. This not only gave him another immense electric power station, but assured the combine of an annual supply of 9,000,000 tons of lignite. The last available report shows that the Rhensch-Westphalian produced the tremendous yearly sum of 626 million kilowatt-hours of energy. Of this 250 millions were used by its own street railways and similar organizations.

Going into southern Germany, Stinnes acquired a big interest in the South German Railway Corporation of Darmstadt. This concern owns street railway systems in 15 German cities.

As the big figure in the Siemens-Rhine-Ebbs-Schuckert Union, Stinnes also derives a income from still other municipalities. The last named corporation owns power stations in Turin and the large mountains, electric light plants in Mannheim and street railways in Vienna, Elberfeld, Barmen and Wuppertal, besides which it owns a big share in the Berlin underground railway system. (Copyright, 1922, NEA Service, Inc.)

LIKE CLOUDS ACROSS A SUMMER SKY

foretelling the dreaded storm are the symptoms of women's diseases which point the way to physical and mental breakdown. The nervous irritability, the backache, the dragging pains, are not only hard to endure, but they bring certain knowledge of collapse unless something is done to relieve the sufferer. There is one standard remedy which has shown the way out for nearly fifty years. The women who have "come back" through the use of Lydia E. Pinkham's Vegetable Compound present an argument stronger than words could ever be.

Steel tempered in phenol has more elasticity and hardens less than when it has been tempered in water.

PEOPLE'S FORUM

Editor Tribune:

On account of the wide and varied rumors arising probably to a certain extent by an anonymous letter recently mailed generally, it is deemed advisable to acquaint the public with the facts in connection with Federal Aid Projects No. 100 and No. 136, commonly known as the Missouri river bridge and adjacent road.

To start a federal aid project it is necessary to appropriate sufficient money to pay one-half of the total cost. The government is then advised of this procedure and designation of an appropriate route is submitted to them. The preliminary inspection by the government determines the feasibility and practicability of the route designated. If it appears that other routes in the vicinity can accomplish the same purpose with less expenditure of money, the alternate route is selected and the projected one is dismissed from consideration.

In connection with the selection of the route for a road from Bismarck to the bridge, the government first advised that they would not consider any route involving a grade crossing it was, therefore, necessary to submit to them two or three routes and to alternate route that was chosen by the government as the best from an engineering standpoint was one passing under the Northern Pacific tracks on the line of Main street in Bismarck and following the line of least resistance from that point to the bridge to the nearest point of that city.

The site of the bridge was selected to meet the requirements of the engineering department of the United States army, that the bridge be constructed within fifty feet of the present Northern Pacific bridge, or not more than 4,000 feet either below or above that bridge, and that it cross the river in a direction at a right angle to the thread of the stream or channel. The present location was the nearest practical location within the range of limits.

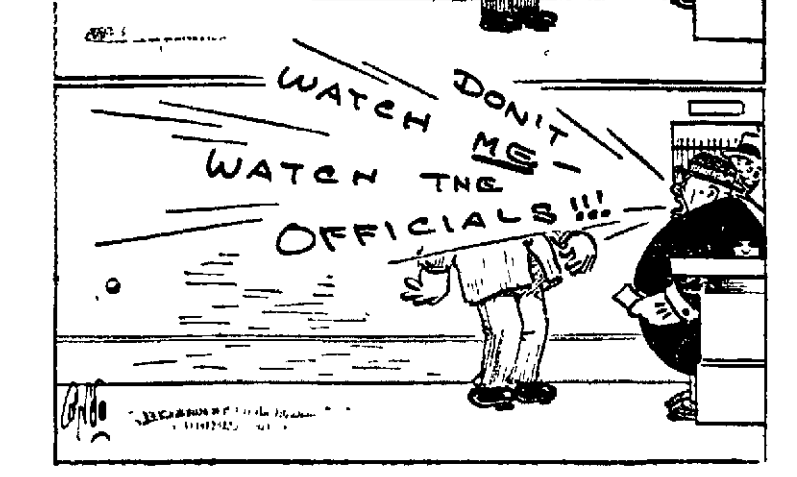

After the adoption of the line of the route for the bridge, it became apparent that curves must of necessity be built at each end of an earthen fill or be built on a concrete approach. The government engineers in conjunction with the State Highway Commission determined that to provide the greatest safety for the traffic it would be advisable to construct the curves on the approaches—It being considered that the loss of one life through accident on account of the curve on

the fill would be worth more than the cost of the bridge itself.

At all of the meetings at which the plans were under consideration, the doors were open to the public and the government engineers took part and advised in the discussions. Every man had an opportunity to present his opinions for or against any part of the project. According to the records there never was a protest entered prior to the adoption of the plans of the road or the bridge. The government engineers have since had submitted to them objections of various local interests concerning the project of the road from the bridge to Bismarck but no points have been raised that were not considered by the government engineers prior to the approval of the plans.

The government, or bureau of public roads, selected a route which they would approve for a road east from the city of Bismarck, which does not involve grade crossings but which can be constructed a great deal cheaper than the projected route of the anonymous petitioners. This road goes straight east on Main street, passing north of the state penitentiary, thence diagonally to the section corner north of the Northern Pacific tracks. The project of a road along the section line north on Ross street has been ruled impractical on account of the great amount of cutting and filling necessary to make ready all the grades. It would seem as though the petitioners in their loud cry believe that the government officials in Washington are swayed by whims or prejudice which are submitted with a loud cry of "Wolf" when the state presents to them carry no semblance of truth or bear out results of any investigation previously made.

In this connection it would appear as though there were something more sinister to the background than their cries of "Wolf." It must be that the same parties who diverted the Red Trail for the benefit of a few pennies in their pockets are the same parties that would have the life of every automobilist risked on the Northern Pacific railroad tracks on the present grade crossing, and who also desire to scatter the traffic of automobiles over all of the narrow resident streets of the city in preference to permitting them to travel through the business section of Bismarck where traffic is regulated and where they can have their dealings and which will allow them a straight route without diversion or detour.

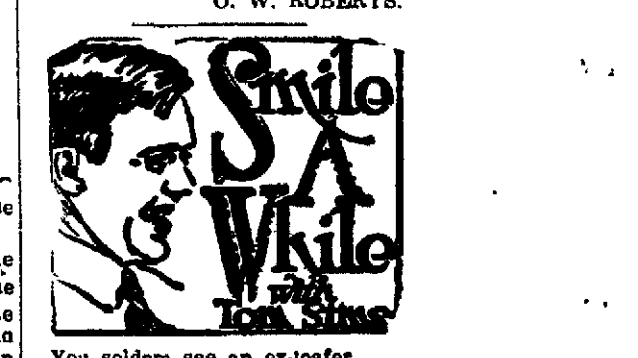

tracks is \$35,000. This estimate, the engineers have stated, is very liberal and considerable in excess of what present contracts are being let for. The government engineers stated that this road was sufficient to take care of all of the travel for several years to come as it provides a wide level surface and approaches the bridge on easy grade. The same type of road is being provided from the bridge to Mandan.

The entire project from one end to the other, including the bridge, has been laid out and constructed according to the original plans as approved in 1919 by the Bureau of Public Roads. There has been no change in direction, grade or elevations and there is no truth in the representations embodied in the anonymous letter referred to.

If there is anyone in doubt as to the truth relative to the bridge they may write to Mr. E. O. Hathaway, District Engineer of the Bureau of Public Roads, St. Paul, Minn., and they can secure full information relative to any phase of the project.

Very truly yours,
O. W. ROBERTS.

You seldom see an ex-loafer.
Now they promise to love, honor and dismay.

Mars comes within forty million miles on June 18. This is about the same as gas prices.
Money isn't everything. The man with the most costly fishing tackle catches the least fish.

TODAY'S WORD
Today's word is ANOMALY. It's pronounced — anom-ah-lee, with accent on the second syllable. It means—something which departs from the common rule, which refuses to be classified or explained. It comes from Latin "anomalus," smoothness uneven or irregular. It's used like this—"It is a strange anomaly of the British parliamentary system that, while a parliament is entitled to membership in the house of commons, she may not sit in the house of lords."

A THOUGHT
In your patience possess ye your souls.—Luke 21:19.
A vexation arises, and our expressions of impatience hinder others from taking it patiently. Disappointment, ailment, or even weather depress us, and our look or tone of depression hinders others from maintaining a cheerful and thankful spirit. We say an unkind thing, and another is hindered. We say a provoking thing and our friend is hurt. Wrong-feeling is more infectious than wrong-doing.—Frances R. Havergal.

ADVENTURE OF THE TWINS

By Olive Barton Roberts

Nancy and Nick watched the Townies for awhile making their funny faces in their funny poppy-leaf bags, then they followed Mr. Peerbout, the Man-in-the-Moon, to another place.

This was called Smokysoot Village. It was beyond the Golden Forest, and as grimy as the forest was bright. As the Moon-Man said, things mortals valued were of no value on the moon and things mortals threw away moon people valued highly.

Smokysoot Village was where the Chimney-Fairies lived with their leader, the Sweep.

"They are just as busy unmaking dreams as the Townies are making them," explained Mr. Peerbout with a wise twinkle of his head.

This was what the little black fellows were doing. Untying bags and pouring out smoky looking stuff into a big barrel. Some of it was green, some yellow and some brown.

"They're ugly dreams," said Mr. Peerbout. "You see old Eena Meena, the Magician, makes awful dreams sometimes and sends them to the Dream Seller, pretending they are nice ones. The Dream Seller then sells them, not knowing what they are. So it's the duty of my Chimney-Fairies to sit on the chimneys o' nights and stop all the fairies with horrid dreams."

"But how can they tell?" asked Nancy.

"All the good dreams are in poppy-leaf bags, and old Eena Meena puts his bad dreams into toad-skins. My Chimney-Fairies can see in the moonlight," replied the Moon-Man.

(To Be Continued)

MANDAN NEWS

F. L. Anders of Fargo is in Mandan on business.

H. H. Williams, of the city, has left for Fargo and Wahpeton on a business visit.

Miss Harriet Center has left for Chicago where she will spend her vacation with friends.

Rodney Love has been named editor in chief of the Spatterix next year. William Stutsman will be business manager.

Richard Furness has been elected to the position of extra delegate from the Gilbert S. Furness post of the American Legion.

Mrs. George H. Spielman entertained at one o'clock luncheon at her home yesterday. Bridge was the diversion of the afternoon.

Campaign headquarters for Porter J. McCumber, candidate for re-election to the United States senate, have been opened up in the Lewis and Clark hotel, room 249, at Mandan.

The funeral of Peter Schoonick of Mandan, who was killed Thursday when the wheel of a freight car passed over his body as he was attempting to crawl between two box cars will be held Saturday morning at 9 o'clock from the St. Joseph Catholic hospital.

Major A. B. Welch left today for a four day visit on the Berthold reservation. He will speak at a Memorial day observance at Mandan, N. D., on May 29. On Memorial day he will talk at two places, Shell Village in the morning and in the afternoon at Elbowoods. Indians of the Arikara, Gros Ventre and Mandan tribes will gather on that day and will assist the world war veterans in the big services to be held. One feature of the program is the gathering of the old Indian scouts of the days of Custer.

Is the 33-year-old Titian-haired schoolmarm who eloped with a 16-year-old boy, a pupil in her school, a former Mandan teacher?

This is a question which is agitating the citizens of Mandan since they read in the Chicago Herald-Examiner that Miss Lena Stamp of Lode, Calif., disappeared with her pupil, Leroy Fry. The name of the ex-Mandan teacher and the California teacher are the same—but the Mandan teacher was not Titian-haired. That, apparently settles the dispute.

Arrest Evaporation

By J. H. WORST, COMMISSIONER OF IMMIGRATION

After a field is seeded to grain and heavy dashing rains beat the surface flat, a hard crust forms which greatly facilitates evaporation. This crust should be broken up when the grain is several inches high. A light drag or weeder will answer the purpose. If a drag is used the teeth should slant backward so that the grain will not be punished too badly. This dragging will not only destroy millions of small weeds which absorb moisture in proportion to their size and numbers, but the granulated mulch produced by the drag will, to a great extent, prevent evaporation. The moisture thus practically bottled up in the soil will be available for the growing plants, until exhausted, regardless of seasonable showers.

With the large amount of water now in the soil, owing to late fall and early spring rains, there should be no lack of moisture necessary to produce a bumper crop next fall. Moreover, with but little extra but properly directed effort, sufficient moisture now falls and that will fall during the season could easily be conserved for crops during the season of 1933. In fact, taking the average annual precipitation over the western half of the state, by giving all grain fields a couple of draggings a week or so apart as above indicated and discing behind the binder—or very soon thereafter—and possibly giving the fields a good dragging before being fall plowed, should heavy fall showers occur, sufficient moisture would be conserved to insure a profitable crop a year hence, so far as moisture is concerned. And moist-

ure is the determining factor, as a rule, in successful farming.

This would require more labor, to be sure, but would the results warrant the additional labor? I believe it would. I further believe so far as relying upon growing wheat exclusively as a farming proposition is concerned, that nothing short of this extra labor will save all wheat farmers from ultimate bankruptcy. I am also convinced that for the extra labor suggested, if efficiently applied, twice as much profit will be realized as may be expected from any equal amount of labor that must be applied to the farming operations. Not only twice the profit per unit of labor, but during occasional seasons this extra work will represent the difference between crop failure and a fair yield of grain. No, brother, there is no danger of your overdoing the tillage question. The danger is that where you save a dollar on labor you lose several dollars on crop.

Gloom Chasers

Russia is importing only about \$12,000,000 worth of goods a month. But she is steadily coming back as a world buyer. Not counting famous relief, Russian imports now are around \$5,000,000 a month, against 10,000 tons a year ago.

Germany is getting about half of Russia's orders. Great Britain is second.

MAIL MOVEMENT

Receipts of 50 leading postoffices now are nearly twice as big as in 1931. The gain is a tenth over a year ago, but a trifle under two years ago. Stamp sales reflect parcel post shipments and letter campaigns for business.

RAILROADS

Idle freight cars still total about 500,000 in excess of "the 7 per cent line or normal." But the figure is slowly dropping again as coal movement grows.

The roads, so far this year, have bought nearly three times as many freight cars as in all of 1931.

AUTO EXPORTS

Auto industry now is exporting twice as many passenger cars and trucks as a year ago. Total auto exports are running over \$100,000,000 a year, exceeding pre-war figures by a third.

No signs of a let-up in domestic sales. Factories are close to capacity, with no easing in parts and axles shortage. Chief danger in this industry now is over-production.

BUILDING BOOM

Big building boom is reflected in advancing prices. Brick prices have been piling up. Lumber market is stiffening as it becomes harder to get prompt shipments from mills. The large quantity scarcity is most acute in cheaper lumbers. Big buyers dominate the market. National lumber shipments exceed 100,000,000 feet a week for first time since the war, but even at that figure production is a fifth below orders.

Looks as if 1932 will set a new record for cement sales. Demand, for road-building, exceptionally big.

LEGAL NOTICES

NOTICE OF SCHOOL ELECTION

(Special District—Annual Election). Notice is hereby given that on the First Tuesday in June being June 6, 1932, an annual election will be held at Will School in the Special School District of Bismarck, N. D., for the purpose of electing the following members of the Board of Education: One member to serve for term of three years for the City of Bismarck. The polls will be opened at 9 o'clock a. m. and closed at 4 o'clock p. m. on that day.

Dated Bismarck, North Dakota, this 20th day of May, 1932.

By the order of the Board of Education.

RICHARD PENWARDEN, Clerk.

NOTICE TO CREDITORS

In the Matter of the Estate of Mary Sinclair Bartholomew, Deceased. Notice is hereby given by the undersigned E. Y. Saries, Administrator of the estate of Mary Sinclair Bartholomew, late of Bismarck, in the County of Burleigh, State of North Dakota, deceased, to the creditors of, and persons having claims against, said deceased, to exhibit them with the necessary vouchers, within six months after the first publication of this notice, at the Bank Building, in the City of Bismarck, in said Burleigh County.

Dated May 18th, A. D. 1932.

E. Y. Saries, Administrator.

First publication on the 19th day of May, A. D. 1932.

FOR SALE—Small ice box, cabinet, talking machine and records, child's pure brass bed, spring and mattress. 5-20-1w

MARKETS

PRICES WEAKEN EARLY.

Chicago, May 26.—Although showing an upturn at the start wheat prices weakened today early. Receipts were large. The opening which varied from unchanged to 1-4 cents higher, was followed by a moderate further gain in some cases and then a setback all around to well below yesterday's finish.

Subsequently persistent buying of July led to something of a rally which, however, failed to hold well. The close was unsettled, 2 cents net lower to 1 cent net advance.

CHICAGO LIVESTOCK.

Chicago, May 26.—Cattle receipts, 4,909, varying weak to firm. Hog receipts, 23,000, active, mostly 5 to 10 cents higher.

ST. PAUL LIVESTOCK.

South St. Paul, May 26.—Cattle receipts 1,300, fairly active, killing classes mostly steady to strong. Spots higher. One choice load beef steers \$37.50. Common to medium beef steers \$36.50 to \$38.50. Bulk \$7.25 to \$8.00. Butcher cows and heifers mostly \$4.00 to \$6.00. Few up to \$7.50 or higher. Stockers and feeders \$5.00 to \$7.50. Bulk \$7.50 to \$8.50. Calves receipts 1,100. Strong to 25 cents higher. Best lights mostly \$8.50. Few up to \$9.25. Seconds mostly \$5.00 to \$6.00.

Hog receipts 6,800. Averaging steady to 10 cents higher. Range \$8.75 to \$10.35. Bulk better grades \$9.85 to \$10.55. Few good pigs \$11.25.

Sheep receipts 100. Fully steady to strong. Good 55 to 60-pound native spring lambs \$14.50. Best native shorn lambs \$12.50. Light shorn ewes up to \$7.00. Heavies down to \$3.50.

MINNEAPOLIS FLOUR.

Minneapolis, May 26.—Flour unchanged to 30 cents lower. In carload lots \$7.95 to \$8.00 a barrel. Shipments 49,464 barrels. Bran \$20 to \$21.

MINNEAPOLIS GRAIN.

Minneapolis, May 26.—Wheat receipts 141 cars, compared to 236 cars a year ago.

Cash No. 1 northern, \$1.50 1-4 to \$1.53 1-4; May, \$1.43 3-4; July, \$1.40 1-4; September, \$1.25 3-8. No. 1 dark northern, \$1.61 1-2 to \$1.63 3-4.

Corn No. 3 yellow, \$1.12 to 55 cents. Oats No. 3 white, 24 3-8 to 35 3-8 cents.

Barley, 52 to 63 cents. Rye, No. 2, 97 3-8 to 88 3-8 cents. Flax No. 1, \$2.68 1-2 to \$2.71 1-2.

BETTER HIGHWAYS IN SOUTH

Over \$278,000,000 Voted for Improved Roads in Dixie—Texas Leads With \$97,772,000.

Bad roads must go! This is the ultimatum of people living in Dixie. That they are alert to their urgent need of good roads is attested by the tremendous sums voted in recent state and county bond issues. Over \$278,000,000 is now available for good roads expenditure in the South. Texas leads with \$97,772,000 and Virginia is second with \$50,000,000.

Hour of Least Traffic.

As the result of a survey made by the bureau of public roads, United States department of agriculture, on the most traveled roads in the country, the hour when there is least traffic is between 2 and 3 o'clock in the morning. Tuesday is the day in the week when traffic reaches the lowest ebb.

Boom in South Carolina.

A state bond issue of \$50,000,000 for improved highways is the object sought by a good roads association just organized in South Carolina.

THE OLD HOME TOWN

Boy Scout Cabin To Be Dedicated

The log cabin which has been built by the Boy Scouts of Troop One will be dedicated this evening, and the public is invited to attend the ceremony which will be held at the cabin situated one-fourth mile north of Ward's. It will be dedicated to Rev. Bruce B. Jackson, founder of the troop, who now lives in Cheyenne, Wyoming.

The members of the troop are very grateful to Mr. B. O. Ward for permission not only to build the cabin on his land, but also to cut logs for its erection. This appreciation was shown by electing Mr. Ward an honorary member of the troop by an unanimous vote at a special scout meeting held Wednesday night.

Everyone is invited, but is responsible for his own transportation and supper. The person who will make the dedication speech has not yet been announced, but the committee will have a person who will do full justice to the occasion. A regular scout meeting will be held at the cabin so that the public may have a chance to see the inner workings of the scout movement.

The scouts hope for a good crowd of people who are interested in scouting to attend tonight, not only to get acquainted with the movement, but also to inspect the boys' work, and while the cabin is being inspected it may be well to remember that there was practically no adult help or supervision.

FOX RAILROAD FILM TO BE SHOWN SOON

Maurice Flynn, the picture star, formerly one of the nation's football heroes, will be welcomed to our city tonight, when he will appear in his latest Fox photoplay, "Smiles Are Trump," at the Capitol theater. This is a railroad tale and has all the speed of a "light engine" going down a forty per cent grade, it is said. The picture was adapted from a Frank L. Packard story called "Tempered Steel."

It begins when Flynn, as Jim Carson, a young assistant paymaster, discovers that his superior officer has been padding the payroll of a section boss. The discovery incenses the paymaster and he sends his subordinate to pay off the men himself—secretly instructing the section boss to be prepared to "get" the bumptious young assistant. What happens from then on provides exciting action galore, which includes several rough-

GIRLS! LEMONS WHITEN THE SKIN

Squeeze the juice of two lemons into a bottle containing three ounces of Orchard White, which any drug store will supply for a few cents, shake well, and you have a quarter pint of harmless and delightful lemon bleach. Massage this sweetly fragrant lotion into the face, neck, arms and hands each day, then shortly note the beauty and whiteness of your skin.

Famous stage beauties use this lemon lotion to bleach and bring that soft, clear, rose-white complexion, all so as a freckle sunburn, and tan bleach because it doesn't irritate.

and-tumble fights, a giddy plunge from an open trestle, and a sensational race between two locomotives on parallel tracks during which Flynn makes a blood curdling leap from one speeding engine to the other.

Leavening Strength Tells the Story

The price you pay for baking powder doesn't determine the results you will have on bake day—it's the leavening strength that counts.

You may buy a baking powder for less than Calumet and think you are practicing economy. Don't be misled—the baking powder will make those that are successful exorbitant in cost.

CALUMET BAKING POWDER

has successfully proven, during the past thirty years, that it contains more than the ordinary leavening strength. That's why bakers where it is employed never fail to raise properly.

Calumet is used by more housewives, leading chefs, domestic scientists, restaurants, hotels and railroads than any other brand. Millions buy it—you should try it.

A pound can of Calumet contains full 16 oz. Some baking powders come in 12 oz. cans instead of 16 oz. cans. Be sure you get a pound when you want it.

"43 Years"

It is with pride that we call your attention to the fact that we have served the people of Bismarck from a small store in the territorial days, to today as you see it, one of the best equipped stores in the state. We are always open to just criticism and will appreciate yours at all times.

Richelieu Pearl Hominy in Tin Cans.

This beautifully white nutritious and very palatable food is not only a breakfast dish but is acceptable at any meal, and will become a favorite with housewives when they learn of its merits. The preparing of Richelieu Canned Pearl Hominy is entirely different from the methods used in the manufacturing of Lye Hominy which is commonly labeled Hominy, the hulls of the corn are removed by soaking the corn in a soda solution. The mechanical hulling of Richelieu Pearl Hominy eliminates any possibility of the adding of a foreign flavor to the corn during its preparation.

Richelieu Pearl Hominy is perfectly seasoned when canned and only requires heating to prepare it for the table as a breakfast cereal to be eaten with sugar and cream. For luncheon or dinner it is delicious served in the form of fritters or croquettes and by the mere adding of a little butter, it also makes a pleasing change from the customary side dish of warm vegetables.

The unique thing about Richelieu Canned Pearl Hominy is the tin contains no free liquids, and the hominy comes from the can in an attractive looking solid mass, which permits of it being sliced into round patties, which, when fried in butter affords a most pleasing food.

Coffee. Coffee.

When you stop to think that 5 1/2% of our business is coffee, you can readily understand why we are so particular.
